HTML

IFrames

Iframes

- An iframe is used to display a web page within a web page.
- An HTML iframe is defined with the `<iframe>` tag

Iframe - Set Height and Width

- Use the height and width attributes to specify the size of the iframe
- Or you can use CSS to set the height and width of the iframe:

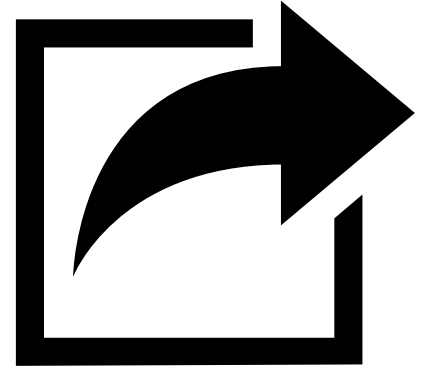

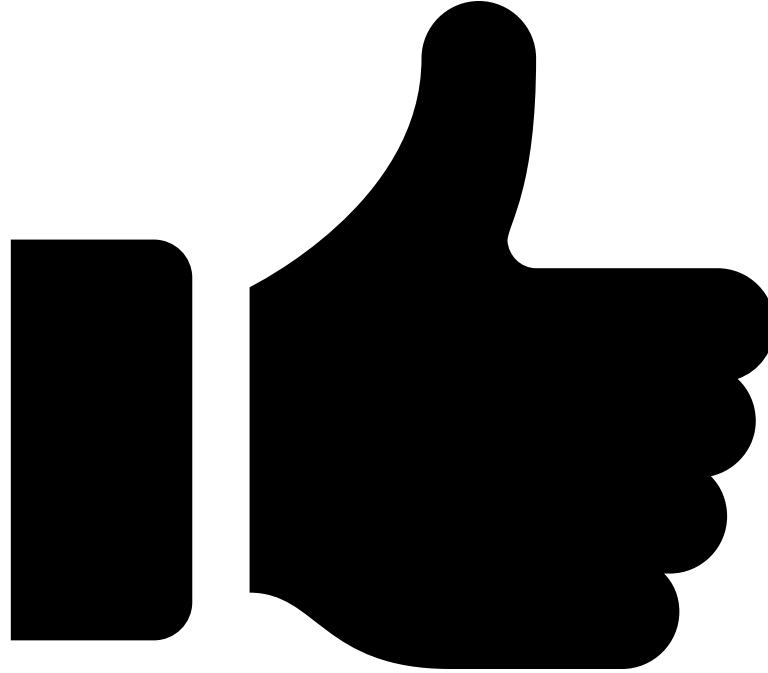

Iframe - Remove the Border

- To remove the border, add the style attribute and use the CSS border property

Iframe - Target for a Link

- The target attribute of the link must refer to the name attribute of the iframe

Thank you
