

HTML

Links - Hyperlinks

Hyperlinks

- Hyperlinks are defined with the HTML `<a>` tag:
- `link text`
- `Visit our HTML tutorial`

Local Links

- A local link (link to the same web site) is specified with a relative URL

HTML Links - The target Attribute

- The target attribute specifies where to open the linked document.

The **target** attribute can have one of the following values:

- **_blank** - Opens the linked document in a new window or tab
- **_self** - Opens the linked document in the same window/tab as it was clicked (this is default)
- **_parent** - Opens the linked document in the parent frame
- **_top** - Opens the linked document in the full body of the window

Link Titles

- The title attribute specifies extra information about an element.
- `Suresh Techs`

Link Colors

- By default, a link will appear like this (in all browsers):
- An unvisited link is underlined and blue
- A visited link is underlined and purple
- An active link is underlined and red

HTML Links – Creating a bookmark

- HTML bookmarks are used to allow readers to jump to specific parts of a Web page.
- Bookmarks can be useful if a webpage is very long.
- First, create a bookmark with the id attribute:
 - `<h2 id="C4">Chapter 4</h2>`
 - `Jump to Chapter 4`
- You can also add a link to a bookmark on another page:
 - `Jump to Chapter 4`
