HTML

Images

Syntax

- images are defined with the <img> tag.

- The <img> tag is empty, it contains attributes only, and does not have a closing tag.

- The src attribute specifies the URL (web address) of the image:

- <img src="*url*">

Src is the path of the image

- Images in another folder

- Images on the server

- Note: Animated images

Alt attribute

- The value of the alt attribute should describe the image:

- If a browser cannot find an image, it will display the value of the alt attribute:

Image Size - Width and Height

- You can use the style attribute to specify the width and height of an image.

- Alternatively, you can use the width and height attributes:

- The width and height attributes always define the width and height of the image in pixels.

- **Note:** Always specify the width and height of an image. If width and height are not specified, the page might flicker while the image loads.

Width and Height, or Style?

- It prevents styles sheets from changing the size of images:
