```c
#include<stdio.h>
#include<string.h>
int main(){
    char name[30];
    char name1[30]="hareesh";
    printf("Enter your name: ");
    scanf("%[^\n]s",&name);
    int length = strlen(name);
    printf("Lenght: %d\n",length);
    strcat(name,name1);
    printf("value in name1:%s\n",name1);
    strcpy(name1,name);
    printf("value in name1:%s\n",name1);
    strrev(name1);
    printf("reverse: %s\n",name1);
    strupr(name1);
    printf("Upper: %s\n",name1);
    strlwr(name1);
    printf("Lower %s\n",name1);
return 0;
}
```
